SUMMARY

Frontend-focused Full Stack Engineer with **4** years of experience building responsive, user-facing applications using **React**, **JavaScript (ES6+)**, and **TypeScript**. Experienced in developing accessible **UI components**, integrating **REST APIs**, and optimizing **frontend performance** and usability for data-intensive products. Collaborates closely with product managers, designers, and backend engineers, writing clean, well-tested code with Jest and Git-based workflows.

WORK EXPERIENCE

Trailblazer Solutions

May 2025 – March 2026

Full-stack developer | Contract | Toronto, ON

- Developed and maintained **user-facing features** in React, Next.js, and TypeScript, improving page load times by 35% and supporting increased traffic for data-intensive views.
- Implemented responsive and accessible UI components based on design specifications, building **reusable** React component libraries that reduced frontend development time by 25 %.
- Integrated frontend applications with backend services via **REST APIs**, designing data flows and MongoDB-backed endpoints that improved API response times by 40 %.
- Wrote clean, maintainable, and well-tested code **using Jest** for unit and integration tests, achieving 95%+ coverage and reducing production bugs by 30 %.
- Collaborated with product managers, designers, and backend engineers in **Agile sprints**, maintaining a 98% on-time delivery rate and participating in regular code reviews.

Sysbioz Solutions Private Limited

June 2021 - July 2024

Full Stack Developer (Front-end Focus) | Ahmedabad, India

- Implemented responsive, component-based UIs using **React**, **HTML5**, **CSS3**, **Bootstrap**, and **Tailwind**, improving Lighthouse performance scores by 33% and reducing page load times by 1.2 seconds.
- Integrated **third-party APIs** for payments (Stripe), authentication, and real-time data synchronization, handling 50K+ daily transactions with 99.8% uptime.
- Debugged, troubleshooted, and resolved frontend issues across browsers and devices, collaborating with backend engineers on API contracts and data validation logic.
- Contributed to the **migration** of legacy PHP applications to a modern **React/Node.js stack**, improving maintainability and enabling modern frontend practices.

ACADEMIC PROJECTS

DineSmart (MERN Stack)

- Built a responsive, user-facing food ordering interface with React, JavaScript (ES6+), and Redux, implementing component-based UI and state management for menu browsing, cart, and checkout flows.
- Integrated the frontend with Node.js, Express, and MongoDB REST APIs, optimizing API calls and client-side rendering to provide fast page interactions and real-time order status updates.

SKILLS

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, responsive design, component-based architecture

UI & Accessibility: Accessible UI components, WCAG-aware implementation, UI/UX implementation, frontend performance and usability optimization, cross-browser compatibility

APIs & Integration: REST API integration, frontend-backend integration, data fetching and state management, real-time data visualization, third-party API integrations (Stripe, authentication)

Tooling & Workflow: Git, GitHub, CI/CD pipelines, Webpack, Vercel, AWS Amplify, Agile/Scrum, code reviews, test-driven development (Jest)

Backend: Node.js, Express.js, MongoDB, PostgreSQL, MySQL

EDUCATION

Computer Application Development

Conestoga College

Sep 2024 - April 2025

Bachelor of Engineering in Information and Technology

Gujarat Technological University

Jun 2019 - April 2022
